

## D Shaped Pillars - Cranbrook and Albermarle Ranges

You will be surprised how common feeder pillars are, in all shapes, sizes and locations.

Cannon manufacture a variety of Bollard Pillars from stainless steel, brushed aluminium and mild steel.

Our bollards are used to control CCTV monitoring equipment, market place electrics and other locations where the local aesthetics need something special.

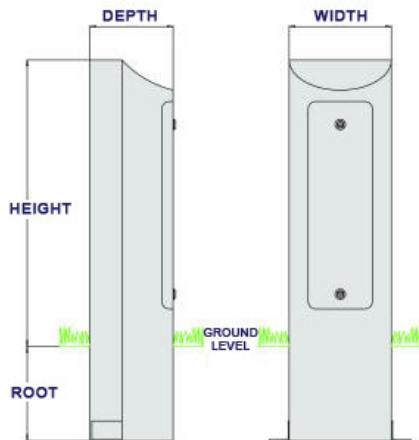

We manufacture standard bollards but also produce to local authority and architectural specifications.

We regularly manufacture these to customer-specific sizes and schemes.
