

Polaire Raising and Lowering Columns

The Polaire Range is our new range of raising and lowering mid-hinged columns. Allowing the column to be lowered to the ground, the Polaire provides a safe and easy method for maintenance.

These columns have been designed to be installed where access is limited, such as, footpaths, railway stations, etc. Cannon have designed the Polaire as a two-part, on-site assembly pack, ensuring weight is kept to a minimum. This will allow staff to carry the parts to the installation location easily and safely.

The lowering and raising of the column is simple to use and does not require the additional purchase of expensive hydraulic pump equipment, etc. as the simple attachable kit is supplied with the column.

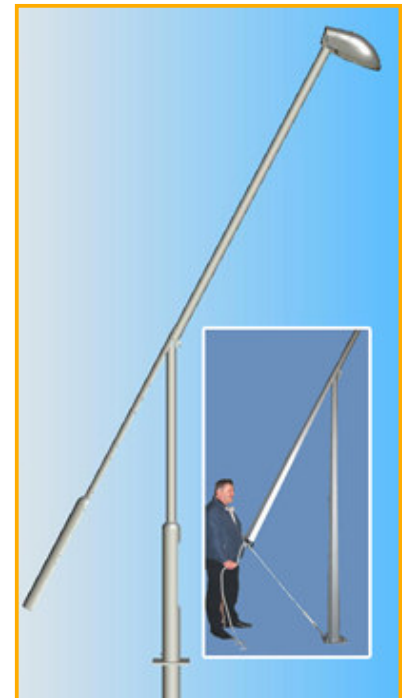

Each column has, as standard, an internal padlock clasp set inside the door compartment and the simple lowering and raising kit can be stowed within the column if required.

Available in tubular-stepped and octagonal, mild steel and aluminium, these columns are available in heights from 5 to 12 metres.

Alternative finishes are available upon request, for example, painted finishes, anti-poster and anti-graffiti paint, bitumen roots.

Item Ref	Column Height above Ground	Shaft Diameter (Spigot Size)	Root Depth
Tubular Column			
FDT0001	5 metre	76 mm	800 mm
FDT0002	6 metre	76 mm	800 mm
FDT0003	8 metre	88 mm (76)	800 mm
FDT0004	10 metre	88 mm (76)	1000 mm
Octagonal Column			
FDC0001	5 metre	60 mm	800 mm
FDC0002	6 metre	60 mm	800 mm
FDC0003	8 metre	60 mm	800 mm
FDC0004	10 metre	60 mm	1000 mm
